

EXPERIENCE

- StackBox

Sep 2025 - Nov 2025

Software Developer

Bangalore,Karnataka

- Enhanced outbound logistics workflows by extending existing internal system capabilities.
 - Designed and implemented improvements in inventory management logic to ensure better tracking and accuracy.
 - Optimized picking and delivery strategies for targeted SKUs and bundled products, improving operational efficiency.
 - EXPOSURE: Node.js, PostgreSQL, GraphQL Migration, Git
- Justbaat

July 2023 - July 2025

Software Developer

Gurgoan, Haryana

- Successfully delivered a **Reporting Dashboard** for the ADX MCM partners, providing real-time visibility into their revenue and performance metrics with filters. This dashboard utilizes data caching from an S3-based database, ensuring a **low latency**. The reporting system is designed to handle **large datasets** and complex backend calculations efficiently, allowing for seamless performance even with substantial volumes of data.
 - Developed applications for managing Ad Player Units and their associated wrapper scripts, enabling users to modify Ad Player properties directly from their interface
 - Developed a **WhatsApp bot** for a variety of use cases, including the delivery of government bills to users. The bot sends **personalized videos** where an avatar speaks about the details of the bill, providing an engaging and informative experience for users.
 - EXPOSURE: Python, Node.js, React Redux, Flask, Langchain, LLM, OpenAi, VectorDB, GCP(Google Cloud), AWS S3, Firebase, Docker, Git
- Singularity Dynamics

June 2022 - June 2023

Full Stack Developer

Bangalore,Karnataka

- Built a **graph-based** visualizer in **Javascript** and **QML** of automatic detection of bugs in the software of Integrated-Circuit-based products.
 - Worked on application of concepts such as **2-D Coordinate geometry** , **Multi-threading** , **Smart pointers**, **BFS/DFS**
 - Created the back end using **Qt and C++** with **SQL** database and the desktop app from scratch using **QML** and **C++**.
 - Optimized the node rendering performance in view-port by 4 times
 - EXPOSURE: C++, QML, SQL, Graph Searching, Multi-threading, Smart pointers, Javascript

PROJECTS

- URL Shortener Service

Spring Boot Project

Github

- Developed a scalable URL Shortener application that converts long URLs into compact short links using a custom hash-based encoding algorithm.
 - Implemented unique short code generation using URL **hashing and Base62** encoding.
 - Designed RESTful APIs for URL creation, redirection, analytics, and link management with proper validation and error handling.
 - Implemented **collision detection** and resolution mechanisms to guarantee unique short URLs across the platform.
 - Built a relational data model in PostgreSQL for efficient storage and retrieval of URL mappings, ensuring uniqueness and fast lookup through indexed short codes.
 - EXPOSURE: Java, Spring Boot, PostgreSQL, JPA, Docker, GitHub

EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
Bachelor of Technology	Indian Institute of Technology, Ropar	7.2	2018-2022
Senior Secondary	Rajasthan Board of Secondary Education	90%	2017
Secondary	Rajasthan Board of Secondary Education	78.6%	2015

SKILLS

- Programming Languages:** Javascript, Typescript, C/C++, Python, Java
- Web Development, AI Development:** Node.js, React.js, Redux, Tailwindcss, Next.js, Langchain, LLM, Prompt Tempting, VectorDB
- DevOps:** Docker, Kubernetes, Azure, Github actions, AWS, Google Cloud
- DataBase Managment:** SQL, MongoDB, GraphQL, Firebase
- Softwares:** VScode, Cursor, Claude, olama, Postman, Git
